Antonina Khisametdinova
Staff UX/UI Designer

Portfolio ninadiz.tech
ninadiz2291@gmail.com
www.linkedin.com/in/ninadiz

SUMMARY: I specialize in the digital transformation of highly technical sectors: energy (renewables & green tech, oil & gas), utilities, medTech, or agriTech. My core strength is in diving deep into technological nuances and translating complex, data-heavy systems (like or multi-vendor IoT integrations) into intuitive, accessible, and error-proof workflows.

SKILLS: design strategy, design thinking, design system, service design, UX/UI design, user flow, wireframe, heuristic evaluation, accessibility. **Research:** fundamental qualitative and quantitative analysis methods: user interviews, usability testing, field studies, user journey mapping, A/B testing. **Tools:** Figma, AI agents (Claude Code, Figma MCP), Google Analytics, Inspectlet, Hotjar, Jira, Miro, Confluence, Lucid Charts, UML diagrams.

And public speaking: **top 3 professional speaker** by listener rating at HeisenBug Conf, 2018 & 2019, shared a stage with Vitaly Friedman.

Latest Experience

ENAPTER AG (2019-2026) *Germany, Berlin*
Hydrogen generator manufacturer · Production in 3 countries · Clients in 55+ countries, including Europe, the US, Thailand and Indonesia

Staff UX designer (2024-2026)

- Led the initiative to design the FTUE (first-time user experience including in-app maintenance guide, documentation and content writing), reducing refilling-related support requests **from >80% to zero**.
- Rebuild the design system for AI agents workflow that helps teams handle **~40%** of tasks without designing Figma artifacts.
- Reduced time-to-market with AI-first workflows: SCADA diagrams for new clients now go into production within two days instead of weeks.
- Align all the interfaces with WCAG AA (and particularly AAA) standards.

Senior UX/UI designer (2019-2024)

- Designed mobile apps for professional users (installers, operators) **with 2,500 MAU.**
- Designed WebGUI (interface that prebuilt on firmware) **installed on 20,000+ hydrogen devices.**
- Created detailed, version- and firmware-specific maintenance instructions in mobile apps (a first of their kind on the market), **improving CSAT from 60% to 80%.**
- Built UI-kit and then design system before Figma made auto-layouts. 😁

Sobaka Pavlova (2017-2019) *St Petersburg*
UX-focused Design Agency

Senior UX/UI designer

- Led design team across a mix of industries such as geology, oil & gas, finance, healthcare, all with complex, data-heavy systems. Worked directly inside client teams as a contracted designer.
- **Speaker at top-tier conferences,** helping bring the agency high-budget international clients.

Education

Kazan State University (2008 - 2013)

Master's degree in chemistry, validated by WES.org

- Interaction Design Foundation, Foundations of UX Design (2014–2015)
- Igor Stange, Ultimate Typography Course (2016)
- HTML Academy, HTML, CSS, JS, React (2020–2024)
- BigPractice, Creative Approach to Designing Interfaces (2025)
- Google Analytics Certification (2018, renewed in 2026)
- Anthropic, AI Fluency: Framework & Foundations (2026)
